I will check to see if they are back tomorrow. I asked them to call me when they returned from calibration. I am in Mississippi on a site right now.

Hi Dave:

How are you this week? We just wanted to see the status of the equipment scheduled to be shipped to the NFB site. Specifically, the Ludlum 2241 3x3 probe and HPIC.

If back from calibrations, please ship to my name at Holiday Inn, 114 Buffalo avenue, Niagara Falls, NY 14303.

Lastly, any update on your potential trip to the site? Germanium and source?

I hope all is well.

Thanks

Regards,

Eric

There is only one Eric, Dave. All the others must be referred to by last name...."Mosher", "Wilson", "Estrada"....

Thanks for your understanding. ☺

Thanks Dave. We have a Radeco calibrator....so I am not sure if one was pending for the Site. Lyndsey may have inquired when ours was in question

Yes the source is for the Germanium detector.

Radeco calibrator is back from calibration. What address should I ship it to?

Thanks Dave. To refresh my memory..... This was source for the Germanium detector? Is there a plan B?

Regards,

Eric

Good Evening Dave:

I wanted to let you know that there were some label issues with shipping the HPIC. They should be resolved and shipped tomorrow, 06/15.

Lyndsey is in Disney right now but she left her notes from the last phone call.

Germanium-2500 pounds

- We now have assigned a bigger trailer for the laboratory. It is a storage container office. It has two doors on the end for the unit for easy access.
- We have to obtain a 2 foot by 4 foot or 3 foot by 3 foot, ½ inch steel plate
- The week of June 26th is the earliest you and the unit could arrive at the Site.

Invoice for the source

- I believe you were waiting for an invoice so I could present to Weston?

Was there anything else?

Thanks

Subject: RE: Shipping Address

The Hazardous declaration should match what it says on the outside of the shipping container, and the shipping case should already be labeled correctly.

They can call me if they have any trouble with the paperwork, but they will need to ship that one under their account since they would be the HAZMAT shipper according to DOT.

OK. I wasn't thinking...I am probably going to drop off the two Viper Ludlum 2241 tonight for overnight shipping via Weston.
I will check around for hazardous shipping certification.....compressed gas classification, correct?

Thanks

Thanks Dave. I do not see the account number below.

The HPIC were calibrated June 24, 2015. Can I assume they are due every year?
Any suggestions with the HAZ shipping?

Regards,

Eric
